A) Legal risks regarding securities regulations

There is a risk that in some jurisdictions the SOFIN Tokens might be considered to be a security, or that it might be considered to be a security in the future. Sofin does not give warranties or guarantees that SOFIN Tokens are not a security in all jurisdictions. Each holder of SOFIN Tokens shall bear its own legal or financial consequences of SOFIN Tokens being considered a security in their respective jurisdiction.

Every Participant is bound to check if acquisition and disposal of SOFIN Tokens is legal in his jurisdiction, and by accepting these Terms, each Participant undertakes not to use SOFIN Tokens should their use not be legal in the relevant jurisdiction. If a Participant establishes that the use of SOFIN Tokens under these Terms is not legal in his jurisdiction, You should not use the SOFIN Tokens, not acquire them and should immediately stop using or possessing them if such case arises.

Acquiring cryptographic Tokens for personal possession and exchanging them for other cryptographic Tokens will most likely continue to be scrutinized by various regulatory bodies around the world, which has so far given mixed reactions and regulatory impact. The legal ability of Sofin to provide SOFIN Tokens and the Platform in some jurisdictions may be eliminated by future regulation or legal actions. In the event, it turns out with a high degree certainty that SOFIN Tokens are not legal in certain jurisdiction, Sofin will either:

- 1) cease operations in that jurisdiction, or
- 2) adjust SOFIN Tokens and the Platform in a way to comply with the regulation should that be possible and viable.

B) Risks associated with Ethereum

SOFIN are based on Ethereum blockchain. As such, any malfunction, unintended function or unexpected functioning of the Ethereum protocol may cause the SOFIN Tokens to malfunction or function in an unexpected or unintended manner. Ether, the native unit of account of the Ethereum may itself lose value in ways similar to SOFIN Tokens, and also other ways. More information about the Ethereum is available at <http://www.ethereum.org>.

C) Risk of unfavourable regulatory action in one or more jurisdictions

Blockchain technologies have been the subject of scrutiny by various regulatory bodies around the world. The functioning of the Ethereum network and associated blockchain networks and SOFIN Tokens could be impacted by one or more regulatory inquiries or actions, including but not limited to restrictions on the use or possession of digital Tokens like SOFIN Tokens, which could impede or limit their existence, permissibility of their use and possession, and their value.

D) Risk of theft and hacking

Hackers or other groups or organizations may attempt to interfere with Your Third-party Wallet, the Website or the availability of SOFIN Tokens and Digital Assets in any number of ways, including without limitation denial of service attacks, Sybil attacks, spoofing, smurfing, malware attacks, or consensus-based attacks. You hereby agree that Sofin shall have no liability for any such loss the Participant incur.

E) Risk of security weaknesses in the Website and/or SOFIN Tokens source code or any associated software and/or infrastructure

There is a risk that the Website and SOFIN Tokens may unintentionally include weaknesses or bugs in the source code interfering with the use of or causing the loss of SOFIN Tokens.

F) Risk of weaknesses or exploitable breakthroughs in the field of cryptography

Advances in cryptography, or technical advances such as the development of quantum computers, could present risks to cryptocurrencies, Ethereum, SOFIN Tokens, the Platform, which could result in the theft or loss of SOFIN Tokens.

G) Risk of mining attacks

As with other decentralized cryptocurrencies, Ethereum blockchain, which is used for the SOFIN Tokens, is susceptible to mining attacks, including but not limited to double-spend attacks, majority mining power attacks, "selfish-mining" attacks, and race condition attacks. Any successful attacks present a risk to the SOFIN Tokens, expected proper execution and sequencing of SOFIN Tokens, and expected proper execution and sequencing of Ethereum contract computations in general. Despite the efforts of Sofin and Ethereum Foundation, the risk of known or novel mining attacks exists. Mining Attacks, as described above, may also target other blockchain networks, with which the SOFIN Tokens interact with and consequently the SOFIN Tokens may be impacted in that way to the extent, described above.

H) Risk of low or no liquidity

Even though there are currently online service available, which enable possibility of exchange of cryptographic tokens between themselves, and also, some of them enable exchange of cryptographic tokens for fiat money, there are no warranties and/or guarantees given that SOFIN Tokens will be listed or made available for exchange for other cryptographic tokens and/or fiat money, and no guarantees are given whatsoever with the capacity (volume) of such potential exchange. It shall be explicitly cautioned, that such exchange, if any, might be subject to poorly understood regulatory oversight, and Sofin does not give any warranties in regard to any exchange services providers. Participants might be exposed to fraud and failure. Participant may not at any given time be able to acquire or dispose of its SOFIN Tokens due to lack of liquidity.

I) Risk of loss of value

Value of SOFIN Tokens may fluctuate and their Participants might suffer loss in value of such acquired tokens. There might be different reasons that would cause unfavourable fluctuations of the value of the SOFIN Tokens.

J) Risk of uninsured losses

SOFIN Tokens are unlike bank accounts or accounts at some other financial institutions and are entirely uninsured.

K) Risk of malfunction in the Ethereum network or any other blockchain

It is possible that the Ethereum network or any other network, to which the SOFIN Tokens are interacting with, malfunctions in an unfavourable way, including but not limited to one that result in the loss of SOFIN Tokens

L) Internet transmission risks

The Participant acknowledge that there are risks associated with using the SOFIN Tokens including, but not limited to, the failure of hardware, software, and Internet connections. The Participant acknowledge that Sofin shall not be responsible for any communication failures, disruptions, errors, distortions or delays You may experience when using the Website and SOFIN Tokens, howsoever caused.

M) Unanticipated risks

Cryptocurrencies and blockchains are new and untested technology. In addition to the risks set forth here, there are risks that Sofin cannot foresee and it is unreasonable to believe that such risks could have been foreseeable. Risks may further materialize as unanticipated.

N) Insufficient interest in Sofin, the Platform and SOFIN Tokens

It is possible that Sofin, SOFIN Tokens or Platform will not be used by a large number of individuals, businesses and other organizations and that there will be limited public interest in the creation and development of its functionalities. Such a lack of interest could impact the development of the Platform.

O) SOFIN Tokens and the Platform, as developed, may not meet the Participant's expectations

The Platform is currently under development and may undergo significant changes before release. The Participant's expectations regarding the form and functionality of the Platform and SOFIN Tokens may not be met upon release of new Website, deployment of the Platform, additional products and services for any number of reasons, including a change in the design and implementation plans and execution of the implementation of SOFIN Tokens.
